

Maggie's Centre

Nottingham

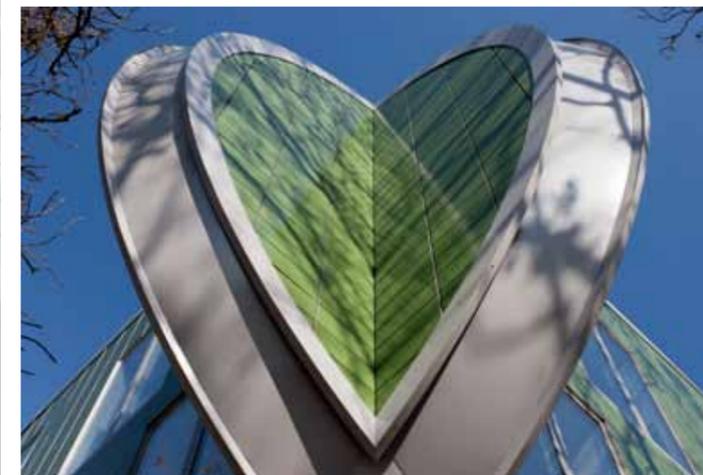

CZWG was commissioned by Maggie's to design a new cancer care centre in Nottingham to serve the East Midlands Cancer Network. It is set on a wooded slope in the grounds of Nottingham City Hospital Campus, between the Oncology Department and the Breast Unit.

The two story building 'floats' above the ground on a semi basement and is accessed by a wide bridge from up the slope. It is visibly part of the hospital but lifted up protectively amongst the trees.

The green glazed oval elevation with their overlapping corners front economical square plans in which the many rooms required flow from one to another. The section exploits the curved roof and soffit to provide different height rooms and spaces. They have been richly furnished to the design of Sir Paul Smith, a famous son of Nottingham. Large balconies extend the rooms out within touching distance of the tree canopies.

"I am delighted to be involved in creating this centre for people living with cancer and their family and friends. It will be a great resource for everyone and a fantastic new addition to the city. Piers Gough is an incredible architect and it has been a joy to work together on the design."

Sir Paul Smith

Address
Nottingham City Hospital Campus,
Hucknall Road, NG5 1PB

Client
Maggie's

Local Authority
Nottingham City Council

Content
Cancer Care Centre to serve the
Mid Trent Cancer Network.
